

Customer Memo – Product Change

Subject: 558-E2 (1/2" CTS Suspensulator™)

Date: June 2019

Please be advised of design changes to our 1/2" Suspensulator (558-E2).

These changes and improvements allow us to produce more parts quicker with a new mold.

This is a rolling change, so we will continue to ship old-style parts until our inventory is depleted.

The spec sheet and product image on the website will be updated within the next few days.

Please contact your Sioux Chief representative for any additional information or to request samples of the newly designed 558-E2.

Thank you,

Carol Flanagan
Product Group Director - Support
