

Sioux Chief Launches Shower Drains Product Video

Sioux Chief shower drains provide quality and versatility for plumbing contractors. The new shower drain video demonstrates available options for both modules and tile shower floors.

Kansas City, Missouri - March 31, 2014 – Rough plumbing manufacturer, **Sioux Chief**, announced the launch of a **new shower drain product video** that enables plumbing contractors and wholesalers to learn more about Sioux Chief design innovation, product features and installation techniques.

For the 821 series tile type shower drain, unique features include the ability to go from a round to a square top with the round-to-square adapter as well as the beveled bottom which allows the drain to be recessed into the subfloor. Sioux Chief drains are offered with a complete line of strainers in a variety of finishes.

“Shower drains are one of Sioux Chief’s core products. The strength of our shower drain offering comes from our continuous focus on process and design innovation and material quality. This is what allows us to provide a better product for our customers,” said Chris Ismert, Sioux Chief product group director.

“A great example of this innovation is the DoubleDuty™ test plug – by including the DoubleDuty with 821 Series drains, plumbing contractors can perform both pressure and water tests with a single, convenient test plug.”

Sioux Chief also offers modular drains for preformed bases in a variety of styles including: no caulk, solvent weld and offset connections. In addition to the 821 series, Sioux Chief offers the 863 series for larger capacity applications as well as the StreamLine™ linear drain for custom installations.

The full Sioux Chief rough plumbing video series offers plumbing contractors need-to-know information about time, labor and money saving innovations in Sioux Chief’s Supply, Drainage and Support categories.

Sioux Chief products are sold through wholesale plumbing distributors nationwide.
