HydroBlock[™]

>>> Ductile Iron Trench Drain System

Unique Design

One-piece, ductile iron design for ultimate durability Applications up to Load Class F900

Installs easily with no fasteners needed. Joints are water-tight and anti-torque

Reusable & Recyclable

The HydroBlock system can be re-used and re-installed as needed Ductile iron material is completely recyclable

>> System Features

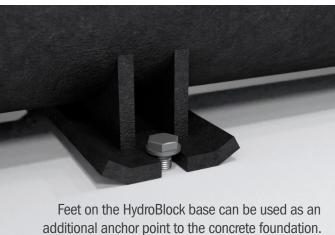

Certified TYPE i

Withstands horizontal forces without the need for concrete encasement.

Only a load-bearing concrete foundation is required.

The feet also facilitate the use of shims to level channels to a specific height.

>> System Installation

Concrete Surface: Asphalt Surface: 3/16"= **Asphalt Layer** Concrete Binder Layer Load-Bearing Load-Bearing Substructure Substructure Installation Installation Support Support Z Concrete Frost-proof Load-bearing Substructure

Note:

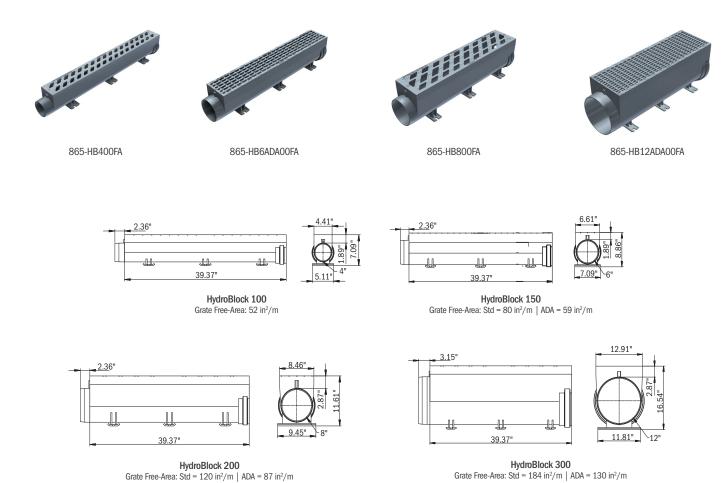

- · Pavers and asphalt can be laid right up to the channel edge - No need for concrete encasement that would disturb the surface aesthetic
- · Available with standard and ADA-Compliant grates. Standard Openings: 0.87" ADA openings: 0.47".

Dimensions (According to Calculation)				
LOAD CLASS ENCASEMENT				
X & Y				
D400	6" C25/30			
E600 / F900	8" C25/30			
Z				
D400	8" C25/30			
E600 / F900	10" C25/30			

Installation instructions above are provided as a guideline only. Full installation instructions are available at www.siouxchief.com
