

Pipe Insulation

Closed-Cell PE Foam

Superior Material

Engineered polyethylene foam provides better rigidity, tensile strength, and tear resistance

Closed-cell foam structure is non-porous and fiber-free, which minimizes moisture ingress and resists mold growth

Good chemical and ozone resistance

Better Performance

Flexible and Rigid - easier to push over existing tube and into tight spaces

Very low water vapor permeability - no additional vapor barriers required

Provides longer-lasting protection in adverse conditions vs. foam rubber

Environmentally Friendly

Reduces noise, condensation, and heat-loss. Conserves energy

Polyethylene foam is completely recyclable

Manufactured without CFCs, HCFCs, HFCs, PBDEs

Better Indoor Air Quality

Low VOC, non-particulating, formaldehyde-free

25/50 flame/smoke rating (ASTM E84)
Passes MVSS302

No observed odor emission

Complete Line

Available in a wide range of IDs and wall thicknesses

Half-slit and Self-seal styles

Made in the USA

TAKE THE FIELD.

Peel-off adhesive liner
resists tearing for
easy removal

Closed-cell foam will
not hold moisture

Ideal combination of
flexibility and rigidity for
easier installation

Technical Specifications

Microbial/Fungi Resistance:
Excellent

Thermal Conductivity: (Btu-in/hr-ft² °F)
75°F mean temp: 0.27
120°F mean temp: 0.295

Thermal Stability: (Linear shrinkage)
Less than 3% @ 200°F

Temp Rating: (working)
-200°F MIN | 200°F MAX
