RE: **CPVC compatibility with plastic hangers, clamps and pipe supports**

Sioux Chief Manufacturing produces a wide variety of hangers, fasteners, and brackets for professional plumbing contractors to use to install and support their CTS water supply lines and DWV pipes. Our plastic hangers are manufactured using a variety of plastic resins.

During the early stages of developing any new product, Sioux Chief takes all precautions to make certain our materials are fully compatible with CPVC tube, regardless of the product's color. Products that are not CPVC compatible are clearly denoted in our catalog.

The list below references our trade names of hanger products that are CPVC compatible. If the product you may be concerned with is not listed below, please contact our office to request an updated copy of this letter. You can reach us Toll Free at (800) 821-3944.

Ape Tape™	Pipe Down™ noise absorption locks	Touchdown™
